Quickstarts – for Teradata Vantage

Our new **Teradata Getting Started** allows all technical builders and developers to get quickly up to speed with Teradata Vantage. Learn about the fundamentals of building on Teradata. Find how-tos & tutorials for common tasks, explore sample source code, and much more.

The full Getting Started Library can be found here <https://quickstarts.teradata.com>

Quick SQL Bytes - LEAD and LAG

LEAD & LAG analytical functions exist in Teradata for SQL compatibility with other database.

Purpose:

Ordered analytic functions calculate an aggregate or non-aggregate value on a window of rows within a group of rows. The window of rows is defined by the Window Framing clause, also called the ROWS clause.

The **LAG** function accesses data from the row preceding the current row at a specified offset value in a window group.

The **LEAD** function returns data from the row following the current row. If the offset value is outside the scope of the window, the user-specified default value is returned.

Teradata Certification Exam Discounts

A quick reminder that Teradata customers are provided with a 22% discount on all **Teradata Vantage exams** taken in 2022!

Customers are encouraged to take advantage of this great offer by using the promo code "VANTAGE22" at exam **registration** checkout.
